

# WISCONSIN PROJECTED AREAS OF COMPETITION

Note: Service shown for 1997 is estimated year-end status.  
Interconnection agreements must be in place with the incumbent local  
exchange provider before service can be provided  
by the new entrant.

## CLEC Service Implementation

## MAP D

The map indicates the presence of two or more companies  
certified to provide facility based local exchange service.

As of October 1997, 25 companies  
were certified as Competitive Local Exchange Companies  
(CLECs) within the state.

While these companies have the ability and certification  
to provide local service throughout an exchange,  
they often compete on a selective basis. The map includes one  
ILEC that provides facility based service outside of its exchange.
